Comfort.

"I was asked to design a chair which would offer all users maximum working comfort in all situations and in all workspaces. A chair that would offer a good seating position and optimum spinal support, without having to use complicated controls. A chair that would fulfil the strictest requirements and offer excellent ease of use. This was the underlying thought which led to this design: Ahrend 230."

Kees de Boer, designer Ahrend 230

Reading, writing, typing, making phone calls, working on a computer, attending a meeting: anything is possible on the Ahrend 230. In every position, active or passive, this chair provides the body with optimum support. The armrests offer ideal support to the user's arms and shoulders. And the rounded seat prevents the blood circulation in the user's legs from being cut off. Adjusting this mechanism is very easy. In short, Ahrend 230 is ergonomic, comfortable and easy to operate down to the last detail.

For every work posture.

Permanent spinal contact: the user's back is optimally supported in all positions. The angle between the chair's back and seat can be adjusted to any required position. An anti-spring-back mechanism ensures smooth unlocking.

Moving while sitting with the synchro-mechanism: the back and seat move along. The spring force can be adjusted to the user's body weight and individual preferences for optimum comfort.

Ahrend 230 has a unique option with a tilting seat. The seat angle can be adjusted as required.

One for all.

All users have their own preferences and requirements.

All users have their own preferences and requirements. But thanks to its great variety of configurations this chair fits everyone and everywhere. The basic version already offers optimum support. It can easily be adjusted by means of convenient control knobs, enabling all users to work in a relaxed position: the one that suits them best. For example, the seat height can be adjusted from 40 to 54 cm, while the back height can be adjusted through 8 cm and the seat depth through 11 cm. The chair amply exceeds the European standard EN 1335 and the NPR 1813 (Dutch working chair standard). And to spare the environment, all the materials that make up this chair can be fully recycled.

Seat depth adjustment

European Standard
EN1335: 4 cm
Ahrend 230: 11 cm

Back height adjustment

European Standard
EN1335: 4 cm
Ahrend 230: 8 cm

Seat height adjustment

European Standard
EN1335: 40-51 cm
Ahrend 230: 40-54 cm

The back is height-adjustable (through 8 cm) by simply pushing a button. The back cushion is shaped to offer optimum spinal support.

The seat height can be adjusted from 40 to 54 cm by means of a gas spring, whereas an extra suspension mechanism ensures good seating comfort even when the chair is in its lowest position. Tall people can choose an adjusting range of 44 to 57 cm.

A good seat does not constrict the blood circulation in users' legs and is not too short either. Ahrend 230 is suitable for different lengths of leg: the seat can be moved forwards or backwards through an adjustment range of 11 cm.

The soft armrests can rotate through 44 degrees inwards and 11 degrees outwards.

The chair can be fitted out with a special armrest for slightly built people: width-adjustable from 33 to 51 cm.

Because good arm support takes the load off the user's neck and shoulders, the armrests are adjustable:

- Height-adjustable from 19.5-31.5 cm (EN 1335: 20-25 cm)
- Sliding forwards and backwards through 10 cm
- Width-adjustable from 38.2-51 cm (in 6 positions) (EN 1335: 46-51 cm)

Active seating.

Sometimes meetings take longer than expected. At such times, sitting in a good position is important to avoid back and neck complaints. And don't forget, visitor and meeting chairs are used intensively by different people. That is why Ahrend 230 enables you to move while sitting thanks to the weight-independent movement mechanism. Tall, short, heavy or light – everybody is immediately seated perfectly.

All models with or without armrests are available in stacking or non-stacking versions.

Chairs with a weight-independent movement mechanism exert a pleasant counterpressure on the user's back. The right chair for long and short meetings.

Just beautiful.

Personalised seating.

The lumbar support can be inflated using bellows.

The chair is constructed in a modular fashion, so that the best possible chair can be compiled for every function and every person. One type of chair can be used to fit out the entire office. And it can be fitted out to your individual preferences thanks to the comprehensive range of materials, paint colours and fabrics that Ahrend offers. Carefully matched, so that all Ahrend furniture ranges can be effortlessly combined with each other.

Ahrend 230

As you please.

Ahrend 230 in brief

The standard for seating comfort. With unlimited adjustment options and unrivalled comfort.

The chair for everyone, whatever their height, weight or build.

Exceeds EN 1335 and NPR 1813 (Dutch working chair standard).

Complements the international standards with Ahrend's standards: top design, enjoying work, value for money.

Range of modular office chairs and matching visitors' chairs to create a harmonious work environment.

Complete series of options. Very good price/quality ratio.

Ergonomics and occupational health and safety. Tailoring the working environment and work facilities to the user: ergonomics. Prevents health complaints and enables you to comply with all statutory guidelines. Visibly more work enjoyment, noticeably less staff absence.

Durable. Timeless design and future-oriented furniture concepts are only useful when combined with durability and sturdiness. This is how fully recyclable Ahrend furniture meets the high quality requirements; untroubled user enjoyment and a long service life go hand in hand.

Interior lifecycle

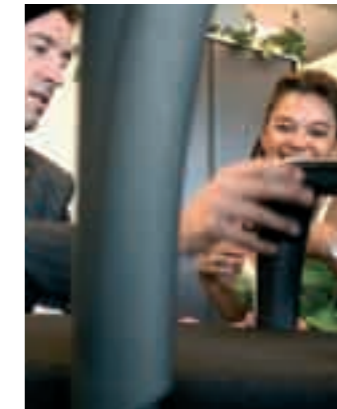

Organisations are flexible, requiring room to grow and change. Ahrend's development never stops; we are always on the lookout for new insights to serve our customers to the best of our ability: from product design to furnishing consultancy and installation. Ahrend creates complete work environments, where quality, care and attention to our products, our people and the environment are at the forefront. Always ready for changes and always oriented towards the future.

Development. Every organisation is different. All the specific furnishing requirements are taken into account. These requirements are translated into tailored advice using three-dimensional draft designs, ensuring each organisation receives specialist attention and efficiency from the beginning.

Implementation. Everything is taken care of. The entire furnishing project is arranged and supervised: delivery, installation, upholstery, lighting and wiring.

Use and management. The occupants of every workspace are given advice about usage for maximum performance and the best work posture for the most benefit. Our Facilities Department will invite you for installation, wiring and maintenance training.

Aftercare and evaluation. Preventive or regular maintenance is available, which can be set out in a contract. Troublefree use and enjoyment go hand in hand with a prolonged service life.

Ahrend.
