WORK WALL

A new way of living the office

Work wall is the result of extensive research into the basic units in the office and into the needs of the workers. The units are now open and flexible with numerous different variations in size, finish and accessories. Sound-damping, easy to assemble and install. This basic element can be matched with components in other systems. Kristal and My Desk for example, offer a wide range of solutions with different materials and colours.

Work Wall is a new way of working. Open and flexible, with great individual comfort and privacy, offered by the sound damping system for example.

Work Wall divides without excluding, equips without occupying space.

WORK WALL

Three components in the office system:
Cabinet, equipped wall
and executive system.

1 Cabinet, constructs the space, guarantees privacy and cuts off noise. Kristal divides without separating, isolates without excluding.

2 Wall. Backup for all activities, sound-dampening barrier. Work wall constructs and helps.

3 General office: a modular office system, flexible and distinguished, My Desk extends the range of office furniture.

Following the path that was undertaken a few years ago, grasping the messages given by modern architecture and technological development, carefully analysing the changing world of work and the results that have been reached so far, my desk is our motivation to continue our research into the innovation that has always distinguished creativity in office solutions.

Arch. Sergio Lion
